

Digital process analytics provides value-driven machine-made insights to access untapped potentials in your operations and supply chain.

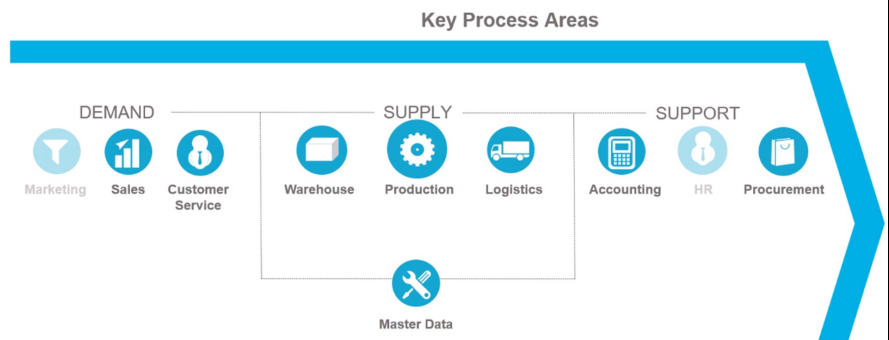

Time For The Next Level of Performance

- Gone through a long period of growth, but the outlook has changed?
- Globally fragmented and distributed organization with heterogenous process and IT-landscapes?
- Looking for the case for change?
- Then, untap the potential in your processes!

Cases for Performance

- Inventory turn driving working capital
- Performance comparison between sites, products, or suppliers
- Efficiency measures like throughput time
- Identification of manual rework and corrections
- Measuring the degree of automation
- Source-to-delivery cycle times

Proof of Value

IconicC runs improvement initiatives with operations and supply chain experts and data scientists.

Try with:

- a digital process analyses in action with your data,
- the delivery of first results within a few weeks,
- minimal input from operational units and IT.
